

Bishop Luffa: Economics Curriculum Map

Many people think of economics as just curves, models, and relationships, but in reality, economics is much more nuanced. Much of economic theory is based on assumptions of how people behave rationally, but it's important that you know what to do when those assumptions fail. Learning about cognitive biases that affect our economic decision-making processes arms you with the tools to predict human behaviour in the real world, whether people act rationally or irrationally.
